

# My.O Office Building Munich

**A unique architectural specimen that reveals the attractiveness and quality of life of the rooms behind it from the outside – this is how the Munich client, CA Immo Deutschland GmbH, describes its new building project, the office building complex MY.O ("My Office").**

Above all, the curved multi-storey arches and arcades are intended to lend the plastered reinforced concrete structure its striking appearance. The building ensemble (approx. 25,000 m<sup>2</sup> GFA) consists of a timber-framed building with five or seven storeys and a free-standing six-storey building with two basements for underground car park and technology.
